

STANDARD Aquatreadmill è un tapis roulant meccanico studiato per aqua walking e aqua running.

- Ideale per attività con classi di allievi coordinate da istruttore
- Dimensioni più contenute e peso più leggero rendono questo modello molto pratico e ideale in vasche di piccole dimensioni
- Materiali adatti anche in caso di prolungati periodi di immersione.

STANDARD Aquatreadmill is a mechanical treadmill designed for aqua walking and aqua running.

- Ideal for activities involving classes of students coordinated by an instructor.
- Smaller dimensions and lighter weight make this model very practical and ideal for small pools.
- Resistant materials suitable for prolonged periods of time in the water.

STANDARD
AQUATREADMILL
cod. AFA 0014

Small, practical and handy, STANDARD AQUATREADMILL still guarantees a wide range of exercises.

Standard Aquatreadmill is a mechanical treadmill for use in water, designed for aqua walking and aqua running.

Ideal for group workouts coordinated by an instructor.

The reduced dimensions and weight are perfect for pools of small dimensions.

Strong belt, ideal for spa pools or when the treadmill must stay in the water for extended periods of time.
