

GALAXY è l'Aquabike orizzontale ideata dal centro R&D di Aquatix per vasche di profondità contenuta tra 70-100 cm.

- Pensata per facilitare il training di chi ha patologie lombari o necessita progressivamente di attivare gli arti inferiori.
- Ottima per qualsiasi persona e per un allenamento completo (attivando anche le braccia), giovandosi della quasi completa immersione del busto, come non è possibile con le Aquabike verticali.
- Indicata anche per circuiti e percorsi/protocolli riabilitativi.
- Pedale resistivo in polietilene, dal design studiato per rendere più fluida ed efficace la pedalata.

GALAXY is the Horizontal Aquabike created by the Aquatix R&D Centre for pools 70-100 cm deep.

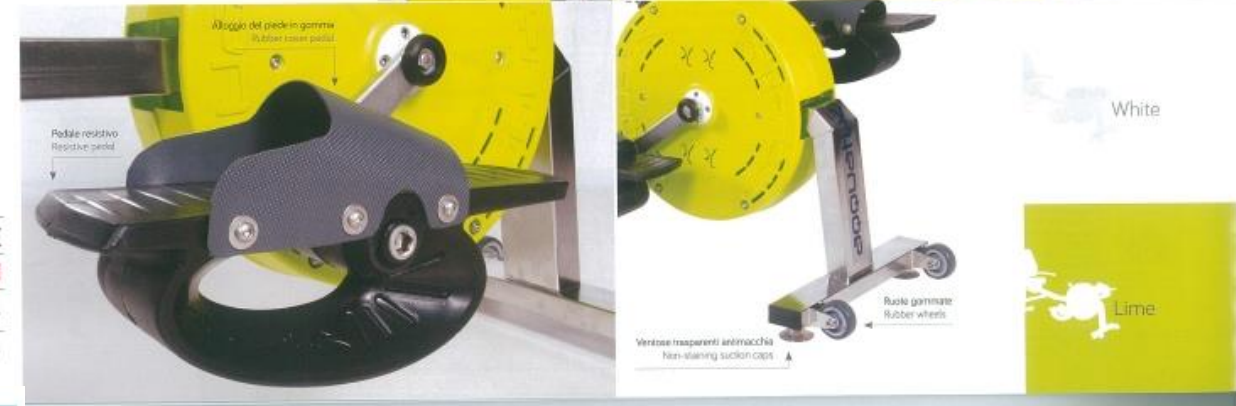

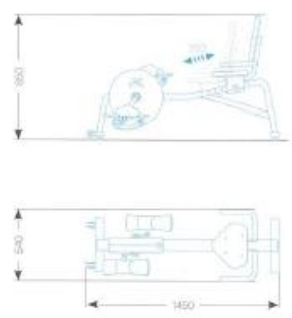

- Designed to facilitate the training of people with lumbar pathologies or who need to progressively activate their lower limbs.
- Excellent for any person and for a complete workout (it also activates the arms), taking advantage of the almost complete immersion of the torso which is not possible with vertical Aquabikes.
- Also suitable for rehabilitation circuits and routes/protocols.
- Resistive polyethylene pedal, designed to make pedalling smoother and more effective.

GALAXY AQUABIKE
cod. AFA 0B01 PRW

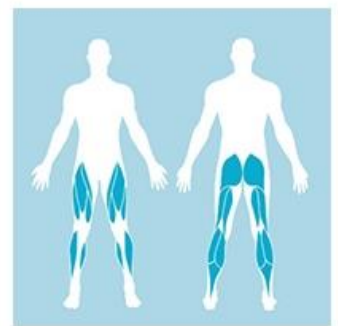

GALAXY AQUABIKE

- + AQUABIKE MADE IN ITALY
- + EXCLUSIVE ITALIAN DESIGN
- + INGOMBRI RIDOTTI
REDUCED OBSTRUCTION
- + SISTEMA REGOLAZIONE INTENSITÀ
INTENSITY REGULATION SYSTEM
- + REGOLAZIONE ORIZZONTALE DA SEDUTI
SEAT ADJUSTMENT
- + IDEALE PER VASCHE MOLTO BASSE
IDEAL FOR SHALLOW POOLS
- + PRODOTTO MARCHIATO CE
CE MARKED PRODUCT

The GALAXY AQUABIKE's exclusive pedalling intensity adjustment system allows you to adjust the resistance, even during the activity, without any interruptions

Aquatic bike designed by Aquatix R&D center, ideal for pool depth 100-70 cm.

- Designed to facilitate the training in lumbar pathologies or progressive activation of lower limbs.
- Favourable for a complete workout (joining it with arms), by the almost complete immersion of the trunk, not possible in regular bikes.
- Suitable for circuit and rehabilitation protocols
- The resistive pedal is in polyethylene, designed to increase pedalling fluidity and strength.
