Harvia Xenio CX180 – novelty

Harvia Xenio - control units with a touch control panel

The control panel of the Xenio control unit provides a modern and subtly stylish interface for controlling the heart of the sauna, be it a traditional electric heater or infrared radiator. The compact yet clear touch control panel can be surface-mounted in almost any space – sauna room, bathroom, dressing room, or even the living room. The control panel shows you when the sauna is at the right temperature for bathing.

Harvia Xenio

- The modern control unit range makes the use of heaters or infrared radiators precise and easy.
- A stylish touch control panel
- Comprehensive set of functions: control operating time, temperature, lighting and fan from the control panel
- The control panel can be fixed to the wall or embedded into the surface to create a smooth appearance

Harvia Xenio CX180

For controlling electric heater

- Temperature adjustment range 40–110 °C
- Operating time adjustment range: 1–6 hours
- Lighting and fan control
- Power unit supply voltage 400 V 3N~

Power unit

Each Harvia Xenio control unit comes with a power unit that is installed in a dry place outside the sauna room.
