

SwimPro™ TOP-MOUNT SAND FILTERS

Offering superb spherical pool filter technology with smooth, efficient flow and balanced backwashing.

SwimPro sand filters feature single piece construction of both main tank body and integral base with corrosion-proof, polymeric material. The internal design features a durable innovative under drain assembly that ensures balanced flow. A versatile seven-position control valve offers both easy operation and maximum efficiency.

For crystal clear, sparkling water with minimum care, SwimPro filters set the standard for performance, value and dependability.

Total System: Pumps | **Filters** | Heating | Cleaners | Sanitisation | Automation | Lighting | White Goods

Maximum efficiency, easy operation and dependability

SPECIFICATIONS – SwimPro™ HIGH-RATE SAND FILTERS	
Filter Type	High-Rate Sand ½ Silica Sand (.45 mm - .55mm), Zeolite or Glass
Filter Tank	Moulded Polymeric
Underdrain	Full Flow innovative box design for Balanced Flow
Control Valve	40mm 7-Position, Top-Mount Vari-Flo™ with Lever-Action Handle
Valve Fastening	Flange Clamp Design
Support Base	Integral with Filter Body

Patented Full-Flow Design

Innovatively designed under drain assembly for smooth, efficient and balanced full flow.

Vari-Flo™ 7-Position Control Valve
with easy to use lever- action handle lets you "dial" any of seven valve/filter functions.
