

# TRi-XO CROSS OVER

High Performance Reverse Polarity  
Minerals and Saltwater Chlorinator

Perfect to use with  
Element™ Mineral Salts

The Zodiac TRi Series has been reinvented and we are proud to bring to market the new **TRi-XO CrossOver** series chlorinator. This new product features everything you have come to expect from the leaders in water care products, plus the added benefit of now being able to 'CrossOver' from using traditional salt chlorination to also mineral chlorination.

Zodiac TRI-XO CrossOver sets a new level of flexibility and control for the pool owner. TRI-XO software has been designed to configure to either using traditional salt based chlorination or CrossOver to the ever growing popular method of using mineral salts. The great thing is that you can CrossOver at anytime, so even if you begin using salt you can reset the software to configure it to use minerals.

### Chlorination

As with its predecessors TRI-XO has been built to take on the harsh environment of the pool area and provide great reliable performance year after year.

The control interface makes setting up a breeze, plus it has a troubleshooting guide and help prompts if there are any issues. TRI-XO also features **genuine Zodiac anode plates** that have been developed over many years of research to ensure it provides the best product for the needs of all pool owners, it is of course a reverse polarity product which **keeps cleaning to a minimum**.

### Upgrade to pH control at anytime

When dealing with pool water chemistry, one of the most important aspects is keeping your pH in balance. Anyone looking for pool water that is always at its healthiest, a **pH balancing unit is a must have**. TRI-XO pH upgrade kits use an intelligent pH sensor that will deliver information to the master control unit and deliver a pH down solution as required. The kit connects seamlessly into the same housing so the overall size does not change. This gives great peace of mind, as **you can upgrade at anytime**, should you not elect to purchase pH control from the start.

### Enhance your bathing experience

Zodiac recommends using TRI-XO with the new mineral salt called Element™. This is a magnesium rich salt blend **making your bathing experience more enjoyable**. In some cases it may be necessary at the start up to use Element™ Activate mineral salts. Seek advice from your pool care professional about converting your pool.

Description	TRI-XO Compact	TRI-XO Mid	TRI-XO Large
Maximum* average pool size (litres)	40,000	70,000	100,000
